

Essay:

"A Road Accident"

"Safety doesn't happen by accident."

Life is full of happy and sad moments. Sometimes an unexpected event changes our lives forever.

A road accident is one of the most unfortunate incidents that can happen at any time. I had heard about road accidents on television and in newspapers, but I had never seen one with my own eyes. One day, I witnessed a road accident, and the scene was so shocking that I can never forget.

"Speed thrills, but kills."

On Sunday evening, I was returning home with my father after visiting the market. The roads were crowded with cars, motorcycles, buses and bicycles. People were busy going to their homes. As we reached a busy crossing, everything looked normal. Suddenly, we heard the loud sound of brakes, followed by a terrible crash. Everyone quickly turned to see what had happened.

We immediately ran towards the accident spot. A young man on a motorcycle had tried to overtake a car from the wrong direction while driving at a very high speed. At the same time, another car was turning at the crossing. Within a second the motorcycle crashed into the side of car. The rider and the passenger were thrown onto the road, and the motorcycle slid several feet away. It was a frightening scene that left everyone shocked and speechless.

"It is better to arrive late than never..."

The injured men were lying on the road and crying in pain. The driver of the car quickly got out and rushed towards them. Broken pieces of the motorcycle were scattered everywhere, and the crowd gathered within a few minutes. Some people looked worried, while others prayed for the safety of the injured. The entire road became silent because everyone was shocked by the accident.

"The purpose of life is to serve, and to show compassion and the will to help others."

Many kind people came forward to help the injured men. Some stopped the traffic so that no other accident would happen, while others tried to comfort the victims. My father also went near them and asked everyone not to panic. A few people offered water, while others tried to make space for the rescue team. It was touching to see the strangers helping each other without expecting anything in return.

"The smallest act of kindness is worth more than the grandest intention."

A responsible citizen immediately called Rescue 1122, while another person informed the traffic police. Some people also called the injured men's family members using the mobile phone they found near the motorcycle. Everyone worked together calmly instead of creating panic. Their quick thinking showed how important it is to stay calm during emergencies.

"No act of kindness, no matter how small, is ever wasted."

~Aesop

Within a few minutes, the Rescue 1122 ambulance reached the accident spot. The rescue workers quickly examined the injured people and gave them first aid. They carefully placed them on stretchers and carried them into the ambulance. They checked their injuries, controlled the bleeding, and rushed them to the nearest hospital. Their quick response gave hope to everyone standing there.

"Whoever saves one life, it is as if he has saved all mankind."

Soon after, the traffic police also reached the accident spot. They controlled the traffic and asked the eyewitnesses how the accident had happened. They noted down the details and examined the damaged motorcycle and car. After cleaning the road, traffic started moving normally again. Their timely action helped prevent the another accident at the same place. The police also advised everyone to follow traffic rules and drive carefully to avoid such accidents in the future.

"Justice delayed is justice denied."

When everything became normal, my father explained the real cause of the accident. The motorcycle rider had ignored the traffic rules and was driving too fast. He tried to overtake another vehicle carelessly, which caused the collision. I realized that a few seconds of carelessness can destroy many lives. Traffic rules are made to protect us and should never be ignored.

"An ounce of prevention is worth a pound of cure."

The accident taught me many valuable lessons. Drivers should always wear helmets and seat belts, follow speed limits, and obey traffic signals. They should never use mobile phones while driving or overtake from the wrong side. Patience on the road can save many lives.

Safe driving is not only important for ourselves but also for everyone around us.

"Better to lose a minute in life than to lose life in a minute."

After watching the accident, I felt very sad and disturbed. The cries of the injured people and the sound of the ambulance stayed in my mind for many days. I thanked Allah that my father and I were safe, and I prayed for the quick recovery of the injured men. From that day onward, I decided that I would always follow traffic rules and encourage others to do the same.

"The greatest wealth is health."

The road accident I witnessed was one of the most unforgettable experiences of my life. It taught me that life is precious and that one careless decision can bring lifelong regret. Every driver, passenger, cyclist and pedestrian has a responsibility to follow traffic rules and protect human life. If everyone drives carefully, many accidents can be prevented.

**"Safety is not expensive,
it is priceless."**

~ Jerry Smith
